                              Elvis Ruçi
                              Henri Tusku

Members Absent: **Alban Salla**

Topics Discussed:

- **First topic of discussion was the communication with the client and how we can specify the requirements in accordance to the problem we are aiming to solve.**
- **Secondly, we talked about the design and layout of the page.**
- **Thirdly, we discussed the UML diagrams that were covered in this week's Software Engineering lecture.**

Decisions Made:

- **We decided the functionality that each user will have which will go in our requirements. We decided on our systems functionality, constraints, dependencies and other requirements. Some of these were also discussed and decided through WhatsApp and not our Google Meet.**
- **As for the design sketches we thought it would be best for everyone to do their own sketch based on the functionality and features we have already decided. Then by the end of the week meaning in 2 to 3 days we will either meet again or we will share them through Whatsapp so we can decide on the best designs as a group. We thought it would be better to have different ideas and then choose among them.**

Tasks Assigned:

- **Continue to work on writing the requirements specification.**
- **Continue to learn about Spring framework by watching and following tutorials.**
- **Create a sketch by hand for the design of the pages.**
